Application for Edutech Summit 2016

The LearnToday group is hosting their annual education and technology summit in October this year. Schools from across India have been invited to take part. The theme of this year's summit is Design, Technology and Change, and the primary focus will be to understand the design cycle by solving real-world problems with innovative thinking. This will involve coming up with an idea, documenting progress, implementing a solution, and then evaluating this solution. This year, there is an added requirement of establishing a symbiotic relationship with a partner school in the remote area.

Participation will involve periodic workshops, coordinating with the partner school, and presenting the idea or model you come up with at the Summit, which is on 22nd October. The competition is open to the students of Grade 11. A team of ten students will be selected on the basis of the application form, which can be accessed via the following link.
