

Math Day: Junior School

The students of classes 3, 4 and 5 proved that Mathematics is not about numbers only, as they enthusiastically participated in the Math Day, on 1st May 2018.

Class 5 students created interesting 2D and even 3D scenes using geometrical shapes while class 3 students made beautiful 2D geometrical greeting cards.

The junior school central courtyard wore a festive look with geometrical and colourful Rangolis made by Class 4 students as a HOUSE activity.

On the whole, it was a day well spent with great learning!!
