

## Mathematics Activities for the Middle School

30<sup>th</sup> AUGUST, 2016

The Maths Club organised a series of activities for the Middle School on 30<sup>th</sup> August, in the Annex Block Library. The aim of this initiative was to engage and excite students with activities based on mathematical concepts. The activities were carefully chosen by the members of the Maths Club and the incharges Ms Deepa Khurana and Ms Geeta Mudhar.

The perfect blend of activities ranged from challenging puzzles & history of mathematics, creative & colourful origami activities, interesting card games, testing their estimation skills, entertaining tooth pick activities to logical coding decoding activity

All the students participated with enthusiasm and enjoyed doing 'maths'. Faculty members of mathematics department took turns to supervise the activity and our Principal, Ms Abha Sahgal too enjoyed and appreciated the activities.

For the Club members, it was an enriching and rejuvenating experience and they too learned a lot in the process. They conducted the activities very responsibly, encouraging the youngsters to think and solve the puzzles. The students were dedicated and high spirited throughout, creating an energetic environment in the library.
