

**SANSKRITI SCHOOL**  
**Dr. S. Radhakrishnan Marg,**  
**New Delhi**

---

In compliance with the mission of our school, to equip each student with the skill that will enable them to make a right choice in life, Sanskriti School provides an exposure to students in each sphere, be it language, science or art. This is done through series of workshops, talks, interactive discussions by renowned personalities in specific fields.

One such interactive talk was organised on 24<sup>th</sup> July, 2015 by Mr. Srijan Pal Singh co-author of the book titled 'Reignited'. The book has been written by Dr APJ Abdul Kalam and it is in the realm of science and technology, its extraordinary achievements and its impact on our lives in the days to come. The result of extensive research, this book offers a plethora of ground breaking ideas that will make youngsters think out of the box.

Mr. Singh introduced the book in a very fascinating manner for the middle school students and very appropriately connected with the known science fictions like Transformers or Interstellar. The enthusiastic students were thrilled to see the execution of 'once dream' science inventions like working robots or space rockets designed to reach other solar system much faster. The talk has aroused curiosity and opened a horizon of possible opportunities available as career paths in areas such as robotics, aeronautics and neurosciences to name a few. Many young avid readers got their copy the books signed by the Author, a limited edition as it has been signed by Dr Kalam.
