Keeping in mind the dengue season, the school has been taking certain preventive measures. We have ensured that the school premise is fumigated from time to time and there are no pots or containers with stagnant water. However, we would like to suggest certain measures which you as a parent can take for your child. These include:

- dress your child in long-sleeved clothing and trousers to reduce exposed skin
- use citronella oil-based creams, sprays, patches or other herbal mosquito repellents

In case you notice the following symptoms, consult your doctor immediately:

- High fever,
- Severe headache,
- Pain behind the eyes
- Nausea and vomiting
- Swollen glands
- Muscle and joint pain
- Skin rash (in some cases)
