

Dear Parent,

Greetings! Trust you and your loved ones are safe.

The cancellation of board exams for the academic session 2020-21 has definitely been a life changing decision for grade 12 students. While it gave a sense of relief to all students and their parents, it certainly brought along some uncertainty about college admissions. Students face planning for the next chapter of their lives without knowing exactly what the college admission process would look like.

However, it gives us immense pleasure to share that many students of our school have received their offer letters from Universities all round the globe. Admissions officers also continue to support the students and are adapting the process to meet the delay in CBSE results by extending document submission deadlines. If any student still faces any concern regarding the same, they may reach out to the career counselor to assist them in providing an assistance letter for the universities.

Additionally, information regarding visa process for foreign destinations as well as Indian university admissions is being disseminated to the students from time to time.

We have reached the end of an academic year that surely required patience, strength and perseverance. Our students have been doing their best in these difficult times and their mental health is our priority. In case of any assistance, you may contact the school counsellors:

Anupama Dhawan
