Design Thinking Bootcamp- November 23, 2019

To introduce and excite students to the concept of Design Thinking a bootcamp was held at Sanskriti School on Nov 23, 2019 by educational transformation company, Mahattattva (<https://mahattattva.in/>). CEO and Founder of Mahattattva, Ms Deepti Sawhney conducted the session which allowed students to go through the four iterations of the design thinking.

Eleven schools from Delhi and NCR participated in the bootcamp with a team of four students and a teacher from each school actively engaged in the session. Twelve students of classes 8, 9 & 11 from Sanskriti School attended the bootcamp. Students and teachers worked in teams to identify a problem in social context, formulate the problem statement, think of the solution and create prototype for the same.

It was an enriching and engaging experience for all.
