

Documentary on 'Nature'

Documentary: Into Nature's Wild

- A Mac Gillivray Freeman award winning film

On 19th December, 2022 grades III, IV and V watched a documentary in the auditorium on the importance of nature and the impact it has on people. The documentary focused on animal and birds, and how they co-exist with each other in perfect harmony. The documentary showed in detail the miracles of nature which are infinite, and how nature never fails to delight us with its beauty and magnanimity!

When people, especially children discover nature they feel at peace with themselves – something that they sorely miss in the hustle bustle of city life. When we live in agreement with nature, we feel joy within, which is unparalleled to anything else around us!!
