

Excursion to Kidzania

On 24th April'19, Sanskriti School organized an excursion to Kidzania for Learning centre. The enthusiasm within the group was high and at 9AM, 33 children along with 11 educators and didi's got on a bus for the venue. It is surely going to be an experience for kids to remember.

It is a

great place for kids to learn, play and gives a real-life experience through role-play activities. It opens avenue for students to look into various professions and help them develop interest to dip into their talent, potential and show their creative aspect.

The students were divided into different groups based on the activities they were participating. This was a real time miniature world where our students experienced the processes which drive various industries. We had fire fighters managing an emergency, children were seen enthusiastically running a Pizza store, Parle biscuit factory and earning through snacks preparation. Experience also included ambulance service, nursing, journalist working on their daily news, theatre where children were taught to dance etc.

They earned money which were called Kidzos for doing the work and could use them to buy or sell things. A day filled with fun for both students and teachers.
