

## 'Amp Up Students Engagement with Google Apps'

February 14, 2020

When teachers effectively integrate technology into subject areas, teachers grow into roles of adviser, content expert, and coach. It helps in promoting an innovation mindset and inculcating 21st century skills among students. Keeping this in view, Sanskriti School conducted a workshop "**Amp Up Students Engagement with Google Apps**" on **February 14, 2020** at Sanskriti School for teachers of Delhi and NCR teaching Social Science, English, Science and Maths to class 6-10.

This workshop was conducted by the Techno@heart team of three experienced and passionate educators of Sanskriti School who are also **Google Certified Trainers**: Ms. Sangeeta Gulati, Ms. Sanchita Ghosh and Ms. Roopali Arora.

In this endeavour, teachers from Delhi and NCR were introduced to effective use of **Slides and Forms** to enhance students engagement in their classroom environment. Teachers were excited to learn how much one can explore available technology and use it to assist them in classroom learning. The enthusiastic participation of the teachers made this workshop a great success.
