

Junior School Maths Day – 06/05/2022

Maths Day was celebrated in grades 3, 4 and 5 on 6th May 2022 to experience the joy of mathematical learning and to explore mathematical concepts in a creative manner. Math is important and it's important to help young children develop their mathematical thinking. These activities like learning new shapes, and exploring geometrical designs can help children develop early spatial and maths skills. Various activities like greeting card making, geometric rangoli making, collage making etc were done:

Children used their innovative ideas to make designs on greeting cards using only geometrical shapes. They made beautiful cards and surprised us by their creativity. Children made lovely rangolis using only geometrical shapes. They used rangoli colours, flowers, chalk dust, diyas etc and decorated their geometric rangolis. They also made collage using colourful cutouts of geometrical shapes. They used their own ideas and innovation and came up with beautiful collages. They thoroughly enjoyed the activity.

It was a fun- filled and joyful experience of learning for the children who exhibited unparalleled excitement while participating in these activities.

Glimpse of the Maths Day 2022
