

Mentorship Programme - Session 1 October 7th 2022

Sanskriti had the first session of the Mentorship Programme on October 7, 2022, from 12:20 to 1:30 in the afternoon. The vision of the programme is to enable greater participation in school activities, settlement in the school environment, adjusting to offline school and the creation of a safe space that promotes understanding and social responsibility. The first session brought together 99 groups of students from across Grades 6 to 12 with teachers in a safe space for conversation, discussing and facilitating connections across the school body. Student mentors from Grades 11 and 12 co-lead the session, with teachers conducting activities to build familiarity and comfort within the group. All groups conducted two main activities with a variety of other discussions, as laughter, smiles, and companionship resounded at Sanskriti.
