

Nursery's Science Days

Nursery celebrated 'Science Days ' from 18th July-19th July 2018 in the Nursery courtyard. The teachers demonstrated various science experiments related to air, water, magnets etc. The children thoroughly enjoyed doing the experiments and were thrilled when they themselves were able to lift the iron clips and pins with a magnet .They excitedly weighed different objects such as erasers, stones, cotton ball on a beam balance to decide which is heavier. They were amazed when a big basketball could float on water while a small coin sank. It was a fulfilled learning experience for the little ones as they did various experiments on their own.
