

## WORKSHOP ON 'DECONSTRUCTING BEHAVIOUR'

Date: 3 August, 2019

Learning Centre organized a workshop on 'Deconstructing Behavior' for parents and professionals. The resource person for the workshop was Ms. Indrani Basu, from Action for Autism.

The workshop laid emphasis on:

- What is behavior?
- How to identify challenging behaviors?
- How to assess the behavior?
- Collection of data about the behavior in question.
- A discussion about the strategies to modify challenging behavior.

The parents were appreciative of the inputs given by Ms. Basu as was evident in their discussion and interaction during the workshop. A handout based on the presentation contained useful information for the care givers.

In their feedback form, all the parents expressed their satisfaction with the workshop. It was an eye opener and a knowledgeable session for parents and professionals.
