

“The important thing is to never stop questioning”

Albert Einstein.....

The Junior school celebrated 'Science Days ' on 17th July-18th July 2019.

In the nursery courtyard, teachers enacted a short skit on reduce , recycle and reuse waste. It was an interactive session where they discussed about our environment and the importance of keeping it clean. The teachers demonstrated various science experiments related to air, water, magnets etc. The children thoroughly enjoyed participating in the experiments and were thrilled when they themselves lifted the iron clips and pins with a magnet .They excitedly weighed different objects such as erasers, stones, cotton ball on a beam balance to ascertain which is heavier. They were amazed to see a big ball float on water while a small coin sink.

As a part of science week , the little scientists of Prep understood different properties of air,water and evaporation through some simple fun experiments such as sink and float, ice cube painting , drying their handkerchief these were conducted in the class. The teachers conducted and explained the concept of air and water cycle through rhyme and an experiment which was another delightful experience for them.

While the students of class 1 experimented with the properties of air and water, the young minds of class 2, enjoyed activities on air pressure, involving balloons, hovercrafts and underwater candles.

In class 3, to rekindle the scientific spirit, students got various science experiments to school. They enjoyed with the theme of " I too can be a scientist". Through the means of various hands on experiments, they understood that like fire needs oxygen to burn, air pressure, natural water filter, vinegar and baking soda produce carbon dioxide when mixed together.

The older students of class 4, enjoyed a competitive healthy salad making competition, as part of the science week and participated in an inter house "Best out of waste" competition. Children made wonderful pen stands, flower vase, robots, etc out of waste materials.

Finally, the senior most class of the junior school, class 5 students enjoyed their nature walks across the Sanskriti School gardens with the Malli bhaiya. They also participated in collage making competition researching about the "Endangered Animals of India".

At the end of the two days, the students of Junior school, enjoyed the experience of being young scientists.
