## **Back to School - Class of 2002**

### **Bees Saal Baad**

Students of Class of 2002 were invited to school on Dec 20, 2022 to mark their 20 years of passing out from the portals of Sanskriti School.

This batch holds a very special place in the hearts of their teachers and Founder Principal, Mrs Gowri Ishwaran. They were the very first group of class 11 who joined us in 2000 as the class 11 was being founded. 69 students from various schools and backgrounds were selected to make the five sections of class 11.

These students are now holding prominent positions in various fields; we have successful entrepreneurs and businessmen/women, doctors, professionals in fields like aerial mapping and technology, college professor in Economics, home makers. We also have a professional (international ) poker player and a talented movie maker among them. These students are currently working in leading positions with Indian Railway,PwC Australia,Cisco Systems, McKinsey, Amazon, World Bank, IMF, Dyson to name a few. More details of the journey of students can be found [here](#)

Nostalgia engulfed the students as the alumni walked into the amphitheater where they were warmly welcomed by class 9 & 11 students. The assembly was a trip down memory lane with the school prayer and a welcome address by the Principal, Mrs Richa Sharma Agnihotri.

Founder Principal, Mrs Gowri Ishwaran graced the occasion by her esteemed presence. It was a special moment for the students to be fondly remembered by her as she proudly spoke of them.

Students of grade 11 performed one of the favourite songs of the seniors and played “Memory Bingo” with them.

This was followed by a school tour and the alumni enjoyed revisiting their old classrooms and appreciated the changes the school has gone through in the past 20 years.

In addition to this a special interaction with the First Head Boy, Shivam Srivastava was organized on Dec 19, 2022 for grade 11 students. His candid and eloquent talk was well received and appreciated by all.

*Mr Shivam Srivastava is Partner at McKinsey & Company in San Francisco and leads Technology Product Practice, working with the world's leading software companies. He has done MBA from the University of Chicago Booth School of Business.*

This reunion has played a big role in reconnecting the students with each other and with the school. We are proud of each and every one of the class of 2002!
